

FORENSIC ANALYSIS REPORT

Image: 2020JimmyWilson.E01 • 2026-02-22 20:22:03 • Model: meta-llama/llama-3.1-8b-instruct

Risk Level: HIGH

EXECUTIVE SUMMARY

The evidence suggests that the system has been compromised by an anti-forensic attack, with indicators of timestomping, shadow deletion, and log clearing. The presence of alternate data streams and an orphaned file may indicate further evidence tampering.

Analysis completed in 50.3 seconds. AI analysis identified 5 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestomping	MEDIUM	80% conf
--------------------------	--------	----------

Evidence: Future timestamps found in 2 files, with sample dates 'USN journal missing'

Explanation: The presence of future timestamps, particularly in the USN journal, suggests that the timestamps have been manipulated.

Recommendation: Verify the authenticity of file timestamps and investigate potential evidence tampering.

Finding #2: shadow_deletion	HIGH	90% conf
-----------------------------	------	----------

Evidence: No System Volume Information folder found, with other indicators including 'No shadow copies found'

Explanation: The absence of the System Volume Information folder and the lack of shadow copies suggest that the Volume Shadow Copy Service (VSS) has been disabled or tampered with.

Recommendation: Investigate potential evidence tampering and verify the authenticity of deleted files.

Finding #3: ads	LOW	40% conf
-----------------	-----	----------

Evidence: 10 alternate data streams found, including '\$BadClus:\$Bad', '\$Extend/\$ObjId:\$O', '\$Extend/\$Quota:\$O', '\$Ea:\$Ea', '\$Ea:\$Ea', '\$Ea:\$Ea', '\$Ea:\$Ea', '\$Ea:\$Ea', '\$Ea:\$Ea'

Explanation: The presence of alternate data streams is a normal Windows feature, but the large number of streams found is unusual and may indicate tampering.

Recommendation: Verify the authenticity of alternate data streams and investigate potential evidence tampering.

Finding #4: deletion	LOW	20% conf
----------------------	-----	----------

Evidence: 1 orphaned file found

Explanation: The presence of an orphaned file may indicate that a file has been deleted, but the lack of other deletion indicators is unusual.

Recommendation: Verify the authenticity of the orphaned file and investigate potential evidence tampering.

Finding #5: log_clearing**CRITICAL****95% conf****Evidence:** 0 Windows Event Logs (.evtx) found**Explanation:** The absence of Windows Event Logs suggests that the logs have been deleted or tampered with, which is a**Recommendation:** Investigate potential evidence tampering and verify the authenticity of deleted logs.

ANTI-FORENSIC ANALYSIS

TIMESTAMPING DETECTION [5677 indicators]*Detects manipulation of file timestamps*

- Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
 - Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++ d/d 37-144-1: AppData 2014-01-25 23:57:39 (IST) 2014-01-25 23:57:39 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestamp): +++ d/d 38-144-5: Local 2015-05-26 18:16:18 (IST) 2015-05-26 18:16:18 (IST) 2015
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++ d/d 86-144-1: Adobe 2015-05-26 18:15:56 (IST) 2015-05-26 18:15:56 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestamp): +++++ d/d 87-144-1: Acrobat 2014-02-10 20:27:11 (IST) 2014-02-10 20:27:11 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ d/d 88-144-5: 11.0 2015-05-26 18:15:57 (IST) 2015-05-26 18:15:57 (IST) 20
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ r/r 482-128-4: AdobeCMapFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 1
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ r/r 479-128-4: AdobeSysFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 18
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ d/d 89-144-1: Cache 2015-05-26 18:15:54 (IST) 2015-05-26 18:15:54 (IST)
- ... and 5662 more

SHADOW COPY DELETION [2 indicators]*Evidence of VSS deletion attempts*

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: Few or no log files found - possible clearing
- Partition 0: No Windows event log files (.evtx) found
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestomping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4
Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Verify the authenticity of file timestamps and investigate potential evidence tampering.
2. Investigate potential evidence tampering and verify the authenticity of deleted files.
3. Verify the authenticity of alternate data streams and investigate potential evidence tampering.
4. Verify the authenticity of the orphaned file and investigate potential evidence tampering.
5. Investigate potential evidence tampering and verify the authenticity of deleted logs.

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
