

FORENSIC ANALYSIS REPORT

Image: 2020JimmyWilson.E01 • 2026-02-23 08:41:55 • Model: meta-llama/llama-3.1-8b-instruct

Risk Level: MEDIUM

EXECUTIVE SUMMARY

The analysis revealed potential anti-forensic activity, including timestomping and alternate data streams, but the evidence is not conclusive. Further investigation is required to determine the legitimacy of these findings.

Analysis completed in 12.5 seconds. AI analysis identified 4 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestomping	MEDIUM	80% conf
--------------------------	--------	----------

Evidence: 2 future timestamps found in the USN journal

Explanation: The presence of future timestamps in the USN journal may indicate that the timestamps have been modified

Recommendation: Verify the authenticity of the timestamps and investigate any potential modifications to the file system.

Finding #2: shadow_deletion	LOW	40% conf
-----------------------------	-----	----------

Evidence: No shadow copies found, but \$Extend metadata exists

Explanation: The absence of shadow copies may indicate that the attacker attempted to delete them, but the presence of

Recommendation: Investigate the Volume Shadow Copy service configuration and logs to determine the reason for the missing

Finding #3: ads	MEDIUM	60% conf
-----------------	--------	----------

Evidence: 10 alternate data streams found, including '\$BadClus:\$Bad', '\$Extend/\$ObjId:\$O', '\$Extend/\$Quota:\$O', '\$E

Explanation: The presence of alternate data streams may indicate that the attacker used this technique to hide data. How

Recommendation: Investigate the contents and purpose of the alternate data streams to determine their legitimacy.

Finding #4: deletion	LOW	20% conf
----------------------	-----	----------

Evidence: 1 orphaned file found

Explanation: The presence of an orphaned file may indicate that a file was deleted, but this could also be a normal occur

Recommendation: Investigate the file system for any potential errors or corruption that may have caused the orphaned file.

ANTI-FORENSIC ANALYSIS

TIMESTAMPING DETECTION [5677 indicators]

Detects manipulation of file timestamps

- Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
 - Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
 - Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++ d/d 37-144-1: AppData 2014-01-25 23:57:39 (IST) 2014-01-25 23:57:39 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestamp): +++ d/d 38-144-5: Local 2015-05-26 18:16:18 (IST) 2015-05-26 18:16:18 (IST) 2015
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++ d/d 86-144-1: Adobe 2015-05-26 18:15:56 (IST) 2015-05-26 18:15:56 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestamp): +++++ d/d 87-144-1: Acrobat 2014-02-10 20:27:11 (IST) 2014-02-10 20:27:11 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ d/d 88-144-5: 11.0 2015-05-26 18:15:57 (IST) 2015-05-26 18:15:57 (IST) 20
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ r/r 482-128-4: AdobeCMapFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 1
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ r/r 479-128-4: AdobeSysFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 18
 - Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ d/d 89-144-1: Cache 2015-05-26 18:15:54 (IST) 2015-05-26 18:15:54 (IST)
- ... and 5662 more

SHADOW COPY DELETION [2 indicators]

Evidence of VSS deletion attempts

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: Few or no log files found - possible clearing
- Partition 0: No Windows event log files (.evtx) found
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestamping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4
Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Verify the authenticity of timestamps and investigate potential modifications to the file system
2. Investigate the Volume Shadow Copy service configuration and logs
3. Investigate the contents and purpose of alternate data streams

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
