Forensic Analysis Report

Report Generated:	February 23, 2026 at 09:51:33 UTC
Analysis Model:	meta-llama/llama-3.1-8b-instruct
Image File:	2020JimmyWilson.E01
Image Path:	/home/utsav/Github/FreeKhana/siem-tool/imageProcessor/2020JimmyWilson.E01

RISK LEVEL: MEDIUM

EXECUTIVE SUMMARY

The analysis suggests that the system may have been subject to anti-forensic activity, including timestamping and alternate data stream manipulation. However, the evidence is not conclusive, and further investigation is required to determine the extent of the activity.

Analysis completed in 17.4 seconds. AI analysis identified 6 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestamping		MEDIUM	80% conf
Evidence:	2 files with future timestamps, USN journal missing		
Explanation:	The presence of future timestamps and a missing USN journal suggests that the timestamps m		
Recommendation:	Verify the integrity of the timestamps and investigate the files with future timestamps		
Finding #2: shadow_deletion		LOW	40% conf
Evidence:	No shadow copies found, \$Extend metadata exists		
Explanation:	The absence of shadow copies is not necessarily indicative of anti-forensic activity, as it could b		
Recommendation:	Investigate the system configuration and maintenance history		

Finding #3: ads		MEDIUM	70% conf
Evidence:	10 alternate data streams found, including Zone.Identifier		
Explanation:	The presence of alternate data streams, including Zone.Identifier, suggests that files may have		
Recommendation:	Investigate the purpose and content of the alternate data streams		

Finding #4: deletion		LOW	30% conf
Evidence:	1 orphaned file, Recycle Bin not present		
Explanation:	The presence of an orphaned file is not necessarily indicative of anti-forensic activity, as it could		
Recommendation:	Investigate the file system and deletion history		

Finding #5: registry_tampering		LOW	20% conf
Evidence:	No forensic tool indicators found		
Explanation:	The absence of forensic tool indicators suggests that the registry may not have been tampered		
Recommendation:	Investigate the registry and system configuration		

Finding #6: log_clearing		LOW	50% conf
Evidence:	62 Windows Event Logs found		
Explanation:	The presence of Windows Event Logs suggests that system activity may be recorded. However		
Recommendation:	Investigate the event logs and system activity		

ANTI-FORENSIC ANALYSIS

TIMESTAMPING DETECTION [5677 indicators]

Detects manipulation of file timestamps

- Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
- Partition 1: Identical SI/FN timestamps (possible timestamp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0

- Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
- Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
- Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
- Partition 1: Identical SI/FN timestamps (possible timestamp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
- Partition 1: Identical SI/FN timestamps (possible timestamp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-
- Partition 1: Identical SI/FN timestamps (possible timestamp): ++ d/d 37-144-1: AppData 2014-01-25 23:57:39 (IST) 2014-01-25 23:57:39 (IST) 201
- Partition 1: Identical SI/FN timestamps (possible timestamp): +++ d/d 38-144-5: Local 2015-05-26 18:16:18 (IST) 2015-05-26 18:16:18 (IST) 2015
- Partition 1: Identical SI/FN timestamps (possible timestamp): ++++ d/d 86-144-1: Adobe 2015-05-26 18:15:56 (IST) 2015-05-26 18:15:56 (IST) 201
- Partition 1: Identical SI/FN timestamps (possible timestamp): +++++ d/d 87-144-1: Acrobat 2014-02-10 20:27:11 (IST) 2014-02-10 20:27:11 (IST)
- Partition 1: Identical SI/FN timestamps (possible timestamp): ++++++ d/d 88-144-5: 11.0 2015-05-26 18:15:57 (IST) 2015-05-26 18:15:57 (IST) 20
- Partition 1: Identical SI/FN timestamps (possible timestamp): +++++++ r/r 482-128-4: AdobeCMapFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 1
- Partition 1: Identical SI/FN timestamps (possible timestamp): +++++++ r/r 479-128-4: AdobeSysFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 18
- Partition 1: Identical SI/FN timestamps (possible timestamp): +++++++ d/d 89-144-1: Cache 2015-05-26 18:15:54 (IST) 2015-05-26 18:15:54 (IST)

... and 5662 more

SHADOW COPY DELETION [2 indicators]

Evidence of VSS deletion attempts

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: No Windows event log files (.evtx) found in listing
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log
- Found 62 Windows Event Log files (.evtx) extracted

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestomping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4
Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Verify the integrity of the timestamps and investigate the files with future timestamps
2. Investigate the system configuration and maintenance history
3. Investigate the purpose and content of the alternate data streams
4. Investigate the file system and deletion history
5. Investigate the registry and system configuration
6. Investigate the event logs and system activity

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
