Forensic Analysis Report

Report Generated:	February 23, 2026 at 10:12:49 UTC
Analysis Model:	meta-llama/llama-3.1-8b-instruct
Image File:	2020JimmyWilson.E01
Image Path:	/home/utsav/Github/FreeKhana/siem-tool/imageProcessor/2020JimmyWilson.E01

RISK LEVEL: MEDIUM

EXECUTIVE SUMMARY

The analysis revealed potential indicators of timestomping, shadow deletion, and alternate data streams. However, the evidence is not conclusive, and further investigation is required to determine the authenticity and purpose of these findings.

Analysis completed in 10.2 seconds. AI analysis identified 4 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestomping		MEDIUM	80% conf
Evidence:	2 files with future timestamps ('USN journal missing', 'USN journal missing')		
Explanation:	The presence of future timestamps suggests that the timestamps may have been modified to co		
Recommendation:	Verify the authenticity of the timestamps and investigate potential evidence of timestomping too		
Finding #2: shadow_deletion		LOW	40% conf
Evidence:	No shadow copies found, System Volume Information folder is missing		
Explanation:	The absence of shadow copies and the missing System Volume Information folder may indicate		
Recommendation:	Investigate the system's shadow copy configuration and verify if shadow copies were intentiona		

Finding #3: ads		MEDIUM	60% conf
Evidence:	10 alternate data streams found, including '\$BadClus:\$Bad', '\$Extend/\$ObjId:\$O', '\$Extend/\$Qu		
Explanation:	The presence of alternate data streams (ADS) may indicate that data was hidden in these strea		
Recommendation:	Investigate the content and purpose of the ADS and verify if they are legitimate or indicative of l		

Finding #4: deletion		LOW	30% conf
Evidence:	1 orphaned file		
Explanation:	The presence of an orphaned file may indicate that a file was deleted. However, this could also		
Recommendation:	Investigate the file's history and verify if it was intentionally deleted.		

ANTI-FORENSIC ANALYSIS

TIMESTOMPING DETECTION [5677 indicators]

Detects manipulation of file timestamps

- Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
- Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
- Partition 1: Identical SI/FN timestamps (possible timestomp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-

- ... and 5662 more

SHADOW COPY DELETION [2 indicators]

Evidence of VSS deletion attempts

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: No Windows event log files (.evtx) found in listing
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log
- Found 62 Windows Event Log files (.evtx) extracted

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestomping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4
Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Verify the authenticity of timestamps and investigate potential evidence of timestomping tools
2. Investigate the system's shadow copy configuration and verify if shadow copies were intentionally deleted
3. Investigate the content and purpose of the alternate data streams

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
