

FORENSIC ANALYSIS REPORT

Image: 2020JimmyWilson.E01 • 2026-02-28 09:46:24 • Model: meta-llama/llama-3.1-8b-instruct

Risk Level: MEDIUM

EXECUTIVE SUMMARY

The analysis reveals potential timestomping activity and alternate data streams that may indicate hiding of data or malicious activity. However, most findings are of low severity, and further investigation is required to determine the legitimacy of these indicators.

Analysis completed in 13.0 seconds. AI analysis identified 6 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestomping	MEDIUM	80% conf
--------------------------	--------	----------

Evidence: 2 files with future timestamps found in the USN journal, indicating potential timestomping activity

Explanation: The presence of future timestamps in the USN journal suggests that the timestamps of files or folders may have been manipulated

Recommendation: Verify the authenticity of file timestamps and investigate the modification of USN journal entries

Finding #2: shadow_deletion	LOW	40% conf
-----------------------------	-----	----------

Evidence: No shadow copies found, but \$Extend metadata exists

Explanation: The absence of shadow copies does not necessarily indicate intentional deletion, as it could be due to a corruption or configuration issue

Recommendation: Investigate VSS configuration and disk space usage

Finding #3: ads	MEDIUM	60% conf
-----------------	--------	----------

Evidence: 10 alternate data streams found, including '\$BadClus:\$Bad', '\$Extend/\$ObjId:\$O', '\$Extend/\$Quota:\$O', '\$Extend/\$Volume:\$V', '\$Extend/\$Volume:\$V', '\$Extend/\$Volume:\$V', '\$Extend/\$Volume:\$V', '\$Extend/\$Volume:\$V', '\$Extend/\$Volume:\$V'

Explanation: Alternate data streams can be used to hide data, but in this case, the presence of these streams may be legitimate

Recommendation: Investigate the content of these alternate data streams and verify their legitimacy

Finding #4: deletion	LOW	30% conf
----------------------	-----	----------

Evidence: 1 orphaned file found

Explanation: The presence of an orphaned file does not necessarily indicate intentional deletion, as it could be due to a file system error or corruption

Recommendation: Investigate the cause of the orphaned file and verify its legitimacy

Finding #5: log_clearing**LOW****20% conf****Evidence:** 62 Windows Event Logs (.evtx) found**Explanation:** The presence of event logs does not indicate log clearing, as it's a normal Windows behavior. However, it's**Recommendation:** Verify log rotation and maintenance policies**Finding #6: registry_tampering****LOW****10% conf****Evidence:** NTUSER hive referenced, but no forensic tool indicators found**Explanation:** The presence of the NTUSER hive is normal, and the absence of forensic tool indicators suggests that no in**Recommendation:** Verify registry integrity and investigate potential issues

ANTI-FORENSIC ANALYSIS

TIMESTOMPING DETECTION [5677 indicators]*Detects manipulation of file timestamps*

- Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
- Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
- Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
- Partition 1: Identical SI/FN timestamps (possible timestomp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-

... and 5662 more

SHADOW COPY DELETION [2 indicators]

Evidence of VSS deletion attempts

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: No Windows event log files (.evtx) found in listing
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log
- Found 62 Windows Event Log files (.evtx) extracted

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestomping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4

Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Investigate timestomping activity and alternate data streams, verify VSS configuration and disk space usage, and investigate the cause of the orphaned file

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
