

FORENSIC ANALYSIS REPORT

Image: 2020JimmyWilson.E01 • 2026-02-28 10:11:50 • Model: meta-llama/llama-3.1-8b-instruct

Risk Level: MEDIUM

EXECUTIVE SUMMARY

The analysis of the forensic evidence suggests that there may be some evidence of anti-forensic activity, but the findings are not conclusive and require further investigation.

Analysis completed in 19.3 seconds. AI analysis identified 5 findings. Anti-forensic analysis detected 5686 potential indicators.

AI ANALYSIS FINDINGS

Finding #1: timestomping	MEDIUM	60% conf
--------------------------	--------	----------

Evidence: 2 files with future timestamps ('USN journal missing', 'USN journal missing')

Explanation: The presence of future timestamps suggests that the timestamps of files have been modified, which could be indicative of anti-forensic activity.

Recommendation: Investigate the file access patterns and modification times of the files with future timestamps to determine if they are related to legitimate activity or potential tampering.

Finding #2: shadow_deletion	LOW	20% conf
-----------------------------	-----	----------

Evidence: No shadow copies found

Explanation: The absence of shadow copies is not necessarily indicative of shadow copy deletion, as it could be due to a system configuration or resource usage.

Recommendation: Verify the system configuration and resource usage to determine if the lack of shadow copies is related to legitimate activity or potential tampering.

Finding #3: ads	LOW	40% conf
-----------------	-----	----------

Evidence: 10 alternate data streams found

Explanation: The presence of alternate data streams is a normal behavior in NTFS, and the absence of any suspicious streams is a positive indicator.

Recommendation: Investigate the contents and context of the alternate data streams to determine if they are related to legitimate activity or potential tampering.

Finding #4: deletion	LOW	10% conf
----------------------	-----	----------

Evidence: 1 orphaned file

Explanation: The presence of an orphaned file is not necessarily indicative of file deletion, as it could be due to a legitimate system operation.

Recommendation: Investigate the file system and file access patterns to determine if the orphaned file is related to legitimate activity or potential tampering.

Finding #5: registry_tampering**LOW****30% conf****Evidence:** No forensic tool indicators found**Explanation:** The absence of forensic tool indicators suggests that the registry has not been tampered with. However, the**Recommendation:** Verify the registry and system configuration to determine if the NTUSER hive is related to legitimate activity

ANTI-FORENSIC ANALYSIS

TIMESTAMPING DETECTION [5677 indicators]*Detects manipulation of file timestamps*

- Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 35-144-1: Documents and Settings 2009-07-14 10:38:56 (IST) 2009-07-14 10:38:
 - Partition 1: Identical SI/FN timestamps (possible timestomp): d/d 4213-144-8: USERS 2015-05-26 18:36:52 (IST) 2015-05-26 18:36:52 (IST) 2015-0
 - Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4376-144-1: BillyBob 2015-05-26 18:36:36 (IST) 2015-05-26 18:36:36 (IST) 2
 - Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4374-144-1: Fred Flintstone 2015-05-26 18:36:10 (IST) 2015-05-26 18:36:10
 - Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 4375-144-1: James Russell 2015-05-26 18:36:21 (IST) 2015-05-26 18:36:21 (I
 - Partition 1: Identical SI/FN timestamps (possible timestomp): + d/d 36-144-6: Jimmy Wilson 2015-05-26 18:16:17 (IST) 2015-05-26 18:16:17 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++ r/r 3960-128-4: NTUSER.DAT{016888bd-6c6f-11de-8d1d-001e0bcde3ec}.TM.blf 2015-
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++ d/d 37-144-1: AppData 2014-01-25 23:57:39 (IST) 2014-01-25 23:57:39 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestomp): +++ d/d 38-144-5: Local 2015-05-26 18:16:18 (IST) 2015-05-26 18:16:18 (IST) 2015
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++++ d/d 86-144-1: Adobe 2015-05-26 18:15:56 (IST) 2015-05-26 18:15:56 (IST) 201
 - Partition 1: Identical SI/FN timestamps (possible timestomp): +++++ d/d 87-144-1: Acrobat 2014-02-10 20:27:11 (IST) 2014-02-10 20:27:11 (IST)
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++++++ d/d 88-144-5: 11.0 2015-05-26 18:15:57 (IST) 2015-05-26 18:15:57 (IST) 20
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++++++ r/r 482-128-4: AdobeCMapFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 1
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++++++ r/r 479-128-4: AdobeSysFnt11.lst 2015-05-26 18:15:55 (IST) 2015-05-26 18
 - Partition 1: Identical SI/FN timestamps (possible timestomp): ++++++ d/d 89-144-1: Cache 2015-05-26 18:15:54 (IST) 2015-05-26 18:15:54 (IST)
- ... and 5662 more

SHADOW COPY DELETION [2 indicators]*Evidence of VSS deletion attempts*

- Partition 1: \$Extend exists but System Volume Information missing (possible deletion)
- Partition 0: No shadow copy indicators found

HIDDEN DATA STREAMS (ADS) [1 indicator]

Alternate Data Streams detection

- Partition 1: Potential hidden data streams detected

LOG CLEARING EVIDENCE [4 indicators]

Evidence of log file clearing

- Partition 0: No Windows event log files (.evtx) found in listing
- Partition 1: Log-related file/command found: eventlog
- Partition 1: Log-related file/command found: .log
- Found 62 Windows Event Log files (.evtx) extracted

REGISTRY TAMPERING [Clear]

Registry modification indicators

No indicators found in this category.

FILE DELETION TRACKING [1 indicator]

Deleted file recovery opportunities

- Partition 1: Orphaned files found (deleted but recoverable): 1 entries

MFT ANOMALIES [1 indicator]

Master File Table irregularities

- Partition 1: MFT contains 16 system file entries

SUMMARY STATISTICS

Category	Indicators
Timestomping	5677
Shadow Copy Deletion	2
Hidden Streams (ADS)	1
Log Clearing	4
Registry Tampering	0
File Deletion	1
MFT Anomalies	1
TOTAL	5686

Overall Anti-Forensic Risk Level: HIGH

RECOMMENDATIONS

1. Investigate the file access patterns and modification times of the files with future timestamps.
2. Verify the system configuration and resource usage to determine if the lack of shadow copies is related to legitimate activity or shadow copy deletion.
3. Investigate the contents and context of the alternate data streams to determine if they are related to legitimate activity or an attempt to hide data.
4. Investigate the file system and file access patterns to determine if the orphaned file is related to legitimate activity or file deletion.
5. Verify the registry and system configuration to determine if the NTUSER hive is related to legitimate activity or registry tampering.

Additional Anti-Forensic Investigation Steps:

- Conduct detailed timeline analysis around detected anomalies.
- Examine Windows Event Logs for evidence of vssadmin or wevtutil commands.
- Analyze \$MFT and \$UsnJrnl for file system manipulation evidence.
- Review Registry hives for persistence mechanisms and tool artifacts.
- Search for known anti-forensic tool signatures and artifacts.
